EDUCATION

Debre Berhan University

Bachelor of Science in Computer Science
2026 -present

Relevant Courses:

- Data Structures and Algorithms
- Web Development
- Database Systems
- Software Engineering
- Object-Oriented Programming

SKILLS

- HTML5
- CSS3
- JavaScript
- React
- PHP
- MySQL
- Git & GitHub
- Problem Solving
- Teamwork

LANGUAGE

English

Amharic

ABOUT ME

Result-oriented Full-Stack Web Developer skilled in building robust web applications using PHP/Laravel (MySQL) and the MERN Stack (MongoDB, Express.js, React, Node.js). Currently a Computer Science student at Debre Berhan University, I am passionate about creating responsive, efficient, and scalable web solutions. With hands-on experience developing real-world projects from scratch, I am eager to contribute my full-stack development skills to innovative teams and grow as a professional developer.

EXPERIENCE

Web Developer (Academic Projects)

Blood Bank Donation System (PHP + Laravel + MySQL) – Completed

- Built a web system for blood bank inventory tracking and stock management.
- Designed a secure relational database and role-based access control (RBAC).
- Implemented user authentication and full CRUD operations for hospital staff.

CRM System (MERN Stack: React, Node.js, MongoDB) – Completed

- Developed a full-stack CRM application to manage customer data and interactions.
- Implemented secure JWT authentication and created dynamic sales dashboards.
- Built scalable RESTful APIs to handle real-time CRUD data management.

Mill House Management System (Java + JavaFX + MySQL) – Completed

- Developed a desktop management application to optimize mill operations.
- Designed an interactive graphical user interface (GUI) using JavaFX.
- Integrated a MySQL database backend to maintain transactional records.

Job Portal Platform (Java + JavaFX) – Completed

- Built a desktop platform for seamless job postings and user applications.
- Implemented authentication and dynamic job listing filter features.
- Connected frontend architecture with a local database for data storage.

HR Management System (Python) – Completed

- Developed an HR application focused on core employee record administration.
- Utilized Python for backend logic, data handling, and file structures.

CRM System (MERN Stack: React, Node.js, MongoDB) – Completed

- Built a full-stack CRM app to manage customer data and team collaboration.
- Implemented secure JWT user authentication and role-based access control.
- Designed scalable RESTful APIs and dynamic dashboards for real-time sales tracking.
